"Conceptualizing Concepts"

Concept Biotech is a Multi-Dimensional Biotechnology firm working in field of waste management since 2002. Our services are not limited to selling products.

We believe to give Ultimate Solutions

Our Services

- Decentralized sewage treatment using Vermifilter and DEWATS Systems
- Turnkey waste management services for Composting / Vermicomposting & Biogas projects
- Helping in creative awareness programs pertaining to SWM
- Contributing ideas for innovative CSR projects involving waste management
- Only company which can treat contaminated soil using Vermi-remidation
- Bio-conversation of ETP Sludge using Vermi technology

Remember the story of Pied Piper of Hamelin, who took the rats to sea and made the city free from rats.

Tumbler queen is doing the same by attracting Food waste to its tummy and produce Compost. Attempting to have "Kachare se Azadi" City.
