ELECTRO TRANSSCORE

INTRODUCTION

Founded in the year 2008, at Vadodra, Gujarat, India. We, "Electro Transcore," are one of the leading names engaged in manufacturing, exporting and supplying of FRP Products like FRP Gratings, FRP Cable Trays, Structural Angles, Structural Channels & Flats, FRP Tubes, Hollow Sections, special profiles. Our pultruded sections are manufactured using optimum quality raw materials and advanced technology, which are in compliance to international standards. These products are extensively appreciated among our clients owing to their features like rigid construction, corrosion resistance, dimensional accuracy, low maintenance and durable finish standards. The offered can also be availed in both, standard as well as in customized options, in order to meet clients' variegated demands. The offered products can also be availed in various sizes and dimensions.

Our robust infrastructural base is facilitated with advanced manufacturing facility that helps us to manufacture bulk products in adherence with defined industry norms. All the departments are managed in order to conduct entire business operations in a systematic manner. Our infrastructure is well-connected with all modern modes of transportation that helps us with prompt delivery of products at client's end. Also, we have hired a team of young and qualified experts, who hold immense experience. An inseparable part of the organization, our team works in sync to contribute towards our success and growth.

Owing to our consistent quality standards, we have been able to deliver premium quality range of products. We have an expert team of quality controllers who conduct stringent tests on entire range on specific parameters before the final delivery. Since the establishment of our firm, the main aim has been to minutely comprehend the exact demands of our clients. Being client oriented firm, we manufacture our products keeping in mind the variegated demands of our clients. We have been able to garner a spread-out base of satisfied clients due to our client centric approach, ethical business practices and transparent dealings.

OUR PRODUCTS

FRP MOULDED / PULTRUDED GRATING

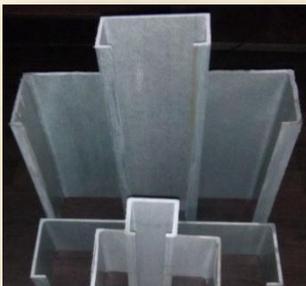

Since our inception, we are instrumental in manufacturing, exporting and supplying premium quality FRP Gratings. Rigid in design, these gratings are commonly used in power plants, Pharma companies chemical plants, refineries, swimming pools and

marine industries etc. Besides being manufactured from qualitative raw material and the latest technology, these gratings are properly checked by our quality experts. These gratings are available with us in various sizes and dimensions at affordable price.

Features: -Precisely designed - Easy fitting - Corrosion-resistance

FRP STRUCTURAL CHANNELS / BENCHPATTI

With sincere intentions to preserve and uplift our reputation in the market, we bring forth a Distinguished assortment Structural Channels. This channel is generally used in building construction, civil engineering, cooling tower and bench gardens and ladders. Channels

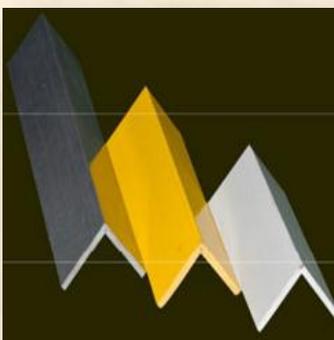

are manufactured from the finest quality raw material that we sourced from the genuine vendors having

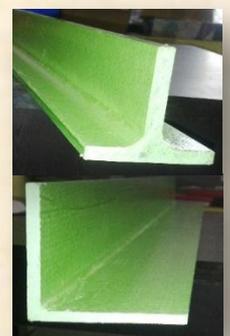

Quality market and the latest technology. After considering the particular needs of the clients, we provide this structural channels in customized prints /options.

Features: - Durable finish standards - Ruggedness - Corrosion Resistant

FRP STRUCTURAL ANGLES

We have gained a remarkable position in the industry by offering a qualitative assortment of Structural Angles that is extensively used at construction sites. Our skilful professionals only use well tested raw material and cutting edge technology while manufacturing of these angles in adherence with set industry defined guidelines. These angles are available in various specifications at competitive prices.

Features:

- High durability
- Rust resistance
- Precisely designed

FRP TUBES AND HOLLOW SECTIONS

Owing to our sedulous professionals and cutting-edge technology, we are engaged in

manufacturing, exporting and supplying a wide

range of Hollow Sections & FRP Tubes. Our clients can avail from us a wide range of quality assured range of Hollow Sections & FRP

Tubes that are extensively used in electrical industries, automotive,

material handling and conveying processes. Manufactured by our

adroit professionals using optimum

quality raw material and quality

fibre-reinforced plastic and

Manufactured using sophisticated technology & offered

sections are in compliance with industry norms. Apart from

this, our quality experts check these sections on various

quality measures in order to ensure their quality and

flawlessness. These hollow sections are available with us in

various sizes, thickness and designs, these tubes are highly

applauded by our clients.

Features: Corrosion resistance - Easy installation - Precise design - Easy to use - Abrasion resistance - Flexible

FRP PERFORATED / LADDER TYPE CABLE TRAY

As per the variegated requirements of our clients, we are offering a broad collection of FRP Cable Trays. These trays are used to support insulated electric cables for power distribution and communication. Manufactured from well tested raw materials and the latest technology, these trays are also checked against several parameters by our skilled professionals.

Clients can avail these trays from us in customized options at reasonable prices.

Features: Easy installation - Excellent strength - Rust resistance

FRP LADDERS

We are known as one of the reputed FRP Ladders from India. The FRP Ladders that we offer, can be used in various sectors like Pharma, marine, chemical factories, domestic and industrial use, etc. These products are available in various size for various height at competitive prices.

Features:

Corrosion Resistance

Aging Resistance

Waterproof

FRP MOTOR COVERS / MOTOR CANOPY

We are an esteemed organization with years of industry experience and expertise in offering FRP Motor Cover to our clients. The global standards have been kept in mind while designing our range of FRP Motor Cover. For development of this FRP Motor Cover, the best quality material has been used which includes best Fiber mate & durable quality resin as well. These covers are anti corrosive and protects motors from factors such as harsh rainfall.

Features:

Sturdy construction - Rust free - Low maintenance

WHY US?

Our success is believed to be associated with huge manufacturing facility that we possess. The offered FRP Gratings, FRP Cable Trays, Structural Angles, Structural Channels, FRP Tubes, Hollow Sections, FRP Sections are manufactured using best grade raw material that is procured from trusted vendors of market. Also, the infrastructure is segregated into various sections to ease the functioning and maximize the rate of production. Moreover, these units are fabrication, quality testing, R & D, warehousing & packaging, etc. We manufacture, export and supply a wide range of FRP Gratings, FRP Cable Trays, Structural Angles, Structural Channels, FRP Tubes, Hollow Sections, FRP Sections.

Some of the factors that have made us a favored choice among clients are:

- Customization facility
- Skilled workforce
- High quality standards
- Wide distribution network
- Customer focused approach
- Proper warehousing facilities
- Transparent business dealings
- On-time deliveries of consignments
- Competitive pricing policy

OUR STRENGTHS

- ▶ Advanced manufacturing facility.
- ▶ Well qualified, highly experienced, self motivated, and growth oriented committed team members
- ▶ Having customer base of quality customers.
- ▶ Ethical business practices and transparent dealings.
- ▶ Wide range of products with quality and at competitive rates.
- ▶ Product with rigid construction, corrosion resistance, dimensional accuracy, low maintenance and durable finish standards.
- ▶ Prompt service to satisfy customer
- ▶ Growth oriented future plans

OUR FUTURE PLANS

- ▶ To Boost sales turnover to 20% - 30% every year.
- ▶ To develop channel partners & sales network Nationally as well as Internationally.
- ▶ To support distributors, so as to increase market share in untouched geography.
- ▶ To increase manufacturing capacity upto more 50%.
